***Detailed Action***

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 26-38, 53-61 and 79, drawn to a propellant free composition, classified in class 424, subclass 434.
  - II. Claims 39-52, 62-78 and 79, drawn to a composition containing propellant, classified in class 128, subclass 200.14.
- Claim 79 neither requires a propellant nor excludes it, therefore it can be examined with either group.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because propellant free compositions do not require the particulars of propellant containing compositions. The propellant free compositions have separate utility such as drops or regular sprays. The propellant compositions require specific containers suitable for containing propellants.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Paul Dietze on 10/21/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete **must** include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
